The CS-206SB is a studio-quality 2-way wall speaker that features excellent clarity, efficient operation, and the warm tones of wood in a compact surface-mount enclosure. A perfect partner for 232-Amp installations, the highly efficient 6.5" woofer and 13 mm" soft-dome tweeter deliver maximum music-quality, clear sound with a minimum of watts. Up to four CS-206SB speakers can be driven by a single 232-Amp.

The speakers can be mounted flush to the wall or pivoted using the included U-bracket. Five-way binding posts are located on the back for 8 ohm wiring.

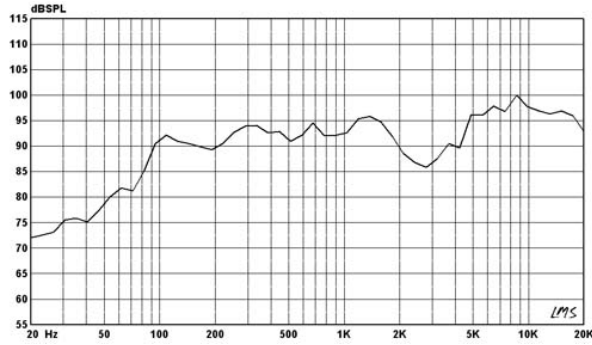

Features

- Two-way, compact wall speaker for 232-Amp audio applications
- Efficient 6.5" woofer and 13 mm soft dome tweeter with studio-quality audio
- Wood construction for full, warm sound
- Binding post wiring with 8 ohm impedance
- U-bracket included for swivel-mounting
- Available in white and black laquer enclosure
